EDUCATION

Bachelor of Science in
Information Technology

2017-2021

University of the Punjab, Lahore.

CGPA : 3.23/4.0

PROFILE

Passionate Game Developer with experience in building 3D games for Android and iOS platforms. Skilled in Virtual Reality (VR), Augmented Reality (AR), and WebGL development. Focused on creating immersive and high-performance interactive experiences.

WORK EXPERIENCE

Euphoria XR

September 2023 - Present

Unity AR/VR & Unreal VR Developer

Worked at Euphoria XR, delivering cross-platform applications across Augmented Reality (AR), Virtual Reality (VR), Android, iOS, and WebGL environments.

Led end-to-end development, including client communication, requirement gathering, backend API integration, and full project delivery including :

● VR - No Code Plugin

Developed a Video Configurator plugin that enables rapid creation of fully interactive 360° VR experiences through an intuitive, no-code workflow.

● VR- Multiplayer Shooting Game

Developed a multiplayer shooting game for Meta quest & Hic VR.

● Fire Extinguisher Training -VR

Developed an interactive VR fire extinguisher training application that guides users through complete emergency procedures from identifying fire types to picking, handling, and using the correct extinguisher.

● Hey-Eve

It's an AI-powered VR platform that enables user to practice courtroom procedures, mock trials, and consultations in an interactive, immersive environment. t provides real-time feedback & practical legal skills.

● Open Health

Developed OpenHealth, a Virtual Reality application focused on educating users about breast implants and their potential side effects through immersive 3D anatomical visualizations.

● ICAO- Aircraft cabin modification

Developed a cabin modification application for ICAO, enabling users to explore and customise aircraft interiors across VR, Android, Windows, and WebGL platforms.

Finz Games

May 2023 - September 2023

Associate Software engineer

As an experienced Unity Developer, expanded expertise into UI, animations, and cutscene systems while developing puzzle and board games. Specialized in designing and building 2.5D gameplay experiences

Game Tech Studio (PVT) LTD.

Unity Game Developer

April 2022- May 2023

Started my career as a fresher, working on open-world and simulation-based game projects. Developed my first complete game independently while gaining strong hands-on experience in physics systems and core gameplay features. Built a solid foundation in implementing game mechanics and problem-solving in real-world development environments.
